Speed the Repair Process with

Paint Gun Washers

Over three decades ago, Herkules revolutionized the body shop industry by creating the Paint Gun Washer. Our washers, also known as spray gun cleaners, continue to set the standard for quality and performance. Durability is built into every model, providing facilities with long lasting, reliable equipment.

Herkules washers are built with corrosion-resistant components that support all types of paint guns, cleaning both solvent and waterborne painting equipment.

All Herkules Paint Gun Washers are proudly made in the USA.
Herkules Paint Gun Washers come in all shapes, sizes and price points, because every shop has a different need. Herkules has a dozen different paint gun washers, offering a super-sized stainless steel unit (G415), aluminum wall units, single tank waterborne, dual tank, Classic Blue and Basic Economy (G100). Herkules has a unit for practically any environment; refer to the chart on the last page for detailed information.

**60 Seconds to Clean with the Classic Blue Tub**

Providing thorough cleaning in under a minute, the Herkules G200 Series features the “Classic Blue” tub. Standard features include an automatic timer and a safety lid shut-off switch. The G202 includes a flow-through brush for manual cleaning. Solvent recycling is simplified with the G205, which integrates easily with a solvent recycler—multiple G205s can share a single recycler. The G210 offers the ability to clean pressure pots, hoses and two 5 gallon cans each cycle.

G200 Series Paint Gun Washers can clean either solvent or waterborne paint guns, YET they must be used exclusively for one paint type ONLY.

**From Stainless Steel with all the Features to our Basic Blue Economy**

Herkules Paint Gun Washers come in all shapes, sizes and price points, because every shop has a different need. Herkules has a dozen different paint gun washers, offering a super-sized stainless steel unit (G415), aluminum wall units, single tank waterborne, dual tank, Classic Blue and Basic Economy (G100). Herkules has a unit for practically any environment; refer to the chart on the last page for detailed information.

### Reduce Clean-up Time, Increase the Bottom Line

The ability to clean equipment quickly and thoroughly results in greater productivity and revenue.
Need

Waterborne Cleaning and Waste Filtration Simplified

Herkules Waterborne Paint Gun Washers simplify manual cleaning by offering a flow-through brush with adjustable control. Both units offer a paint coagulation accelerator and a filtration system to speed recycling and waste disposal.

A Single Scoop Does the Job!

Herkules Coagent
Superior Coagulant for Waterborne Paint

Sparkle Clean
Cleaning that Hits the Spot
Portable pumpless aerosol paint gun cleaning with two stream options.

COMBO Units Provide Multiple Cleaning Capabilities in One Location

Dual tank Herkules Paint Gun Washers enable both waterborne and solvent paint gun cleaning at one location, with closed tank(s) and an adjustable flow-thru brush. Each unit offers manual cleaning capabilities, and the G520 even provides an open cleaning station design, with hands-free wash & rinse nozzles, an air-dry gun, and a filtration system to efficiently separate paint waste.

Lightweight ALUMINIUM Units Enable Quick Cleaning in Small Spaces.

Enjoy thorough single-handed cleaning of EITHER waterborne or solvent paint guns with these two lightweight units. The Quick Clean G507 with its powerful pump can go anywhere that can access an air-line, while the G45 Fast Track Paint Gun Washer is powered by Herkules Sparkle Clean Blast, enabling portable pumpless cleaning practically anywhere.
